

Full Stack Web Developer | React Developer (240) 481-8666 | Silver Spring, MD
contacthiwot@gmail.com

◆ Professional Summary

Full-Stack Web Developer skilled in **React.js, Node.js, Express.js, MySQL, and Firebase**, with hands-on experience building functional web applications. Experienced in full CRUD workflows, role-based access, and collaborative project development.

◆ Technical Skills

Front-End: React.js, HTML5, CSS3, JavaScript, Context API, useReducer, React Query

Back-End: Node.js, Express.js, REST API, JWT, Firebase Auth

Database: MySQL, Firebase

Tools & Deployment: GitHub, Netlify, Email.js, Stripe, Postman

◆ Professional Experience

Independent Full-Stack Developer | *Aug 2023 – Present*

- Delivered **3+ full-stack applications** simulating business operations and user engagement.
- Built **responsive front ends** using React.js and reusable components.
- Engineered **secure APIs** with Node.js, Express.js, and Firebase Auth.
- Optimized **scalability and performance** with React Query, Hooks, and JWT.
- Managed **team workflows via GitHub**: pull requests, code reviews, branching.
- Handled **deployment and user communication** via Email.js and Stripe integration

◆ Portfolio Projects

Amazon-Inspired/Clone E-Commerce Web App | *React, Firebase, Stripe, Netlify, Context API, useReducer*

- Full-stack e-commerce app with **secure checkout** and **dynamic cart**.
- Managed **global state** with Context API and useReducer.
- Deployed **frontend to Netlify**, backend to Firebase.

Social Media Platform | *React.js, Node.js, Express.js, React Query, MySQL, JWT*

- Developed full-stack **social platform** with **real-time updates**.
- Implemented **JWT authentication**, dark mode UI, and image uploads.
- Demo & full project available on my portfolio

G3 Auto Repairs — Auto Repair Management System (Group Project) | *React.js, Node.js, Express.js, MySQL, JWT*

- Built **role-based auto repair management system** with a cross-functional team via GitHub.
- Developed **order, customer, and service modules**; implemented CRUD and role-based access controls.
- Demo & full project available on my portfolio

OTS Transportation Website (Group Project) | *React.js, Email.js, Netlify*

- Designed **marketing site** for a local taxi service; integrated Email.js contact form.
- Deployed on **Netlify** for fast, reliable hosting.

◆ Education

- BA in Business Administration & Information Systems
Addis Ababa University College of Commerce, Ethiopia

◆ Additional Skills & Strengths

- Strong communication and problem-solving
- Fast learner and team player
- Time management and task follow-through
